

ZY-D200

Multi-Functional Marking System

Rapid Batch Labeling, Permanent Information Retention

Laser marking, no need for ribbon, ink and toner

Support batch import of information, support content customization

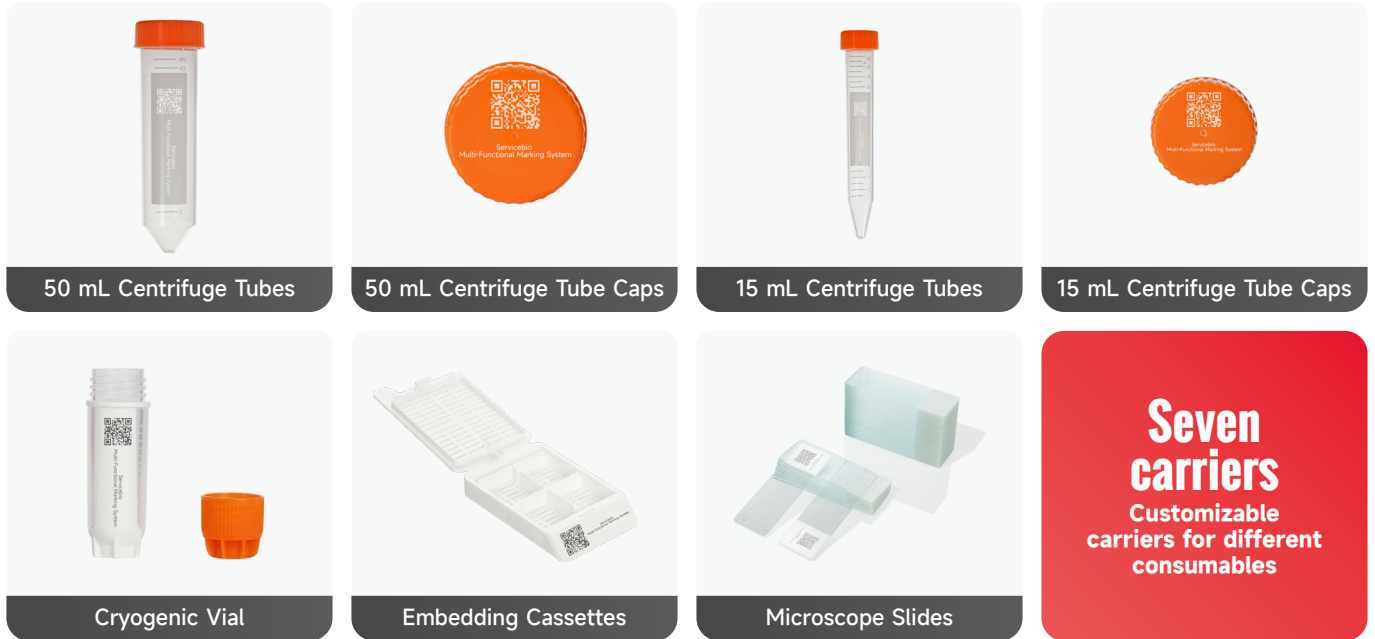

Visual automatic recognition of printed items

With built-in computer, keyboard, mouse, plug and play

3W UV laser, air-cooled and low noise

Support customized

Marking Effect Image

Applications

 The content written by a marker pen on a centrifuge tube is easily dissolved by the reagent, resulting in illegibility

Laser marking, permanent mark

 Microscope slide have a small writing area, and handwriting is illegible and messy. Writing with a pencil will cause debris to contaminate the sample

Clear text, high precision

 When dealing with a large number of frozen tube labels, handwriting is inefficient and prone to errors, and the cost of attaching low-temperature resistant label paper is high

Batch import of information, high throughput; no need for ribbon, high cost-effectiveness

 Marking System on the market still require separate purchase of computer systems, keyboards, and mice

Comes with a computer system, keyboard, mouse, plug and play
